Toronto vs Manhattan

Introduction

This project aims to help investors to obtain an insight on venues from Toronto, and Manhattan. The purpose of this project is to help these potential investors select a business to invest in based on the on the rating of that business.

Data Description

For the city of Toronto I will be scraping the data through Wikipedia link, https://en.wikipedia.org/wiki/List_of_postal_codes_of_Canada:_M. The obtained data will be raw, so I am going to do some data manipulation and cleansing before being able to use it in the program. As for Manhattan, I have decided to export the processed data from "Neighborhoods-New-York-py-v1.0" to a csv file and then read to obtain the data needed to gain helpful insights, and perform comparison between the two cities.
